DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, drawn to a storm water pretreatment system, classified in class 210, subclass 257.1.
 - II. Claims 12-21, drawn a method for pretreating storm water, classified in class 210, subclass 767.
2. The inventions are distinct, each from the other because of the following reasons:
 - Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method of Invention II can be practiced by a materially different apparatus than that of Invention I. For example, the method does not require the first and second pipes for flow between the units, but the units could be adjoining tanks have a cascade flow therebetween and the valve could be a weir.
 - Restriction for examination purposes is proper because of the reasons given above and also because (i) they have acquired a separate status in the art as shown by their different classification, (ii) the search required for the respective groups is not necessarily required by each of the other groups, and (iii) their subject matter is recognized as divergent.
3. A telephone call was made to Chad Hinrichs on 9-16-2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1723

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
